

OFFICIAL

COVID-19 vaccination programme: training products list

Version 8, 11 January 2021

Updates in this version

New/updated products:

- Pfizer/BioNTech vaccine preparation and administration video and poster have gone live
- Onboarding checklist has been updated and recirculated with the system to reflect the revised statutory/mandatory e-learning requirements for registered healthcare professionals coming through NHS Professionals
- Section added on legal mechanisms for administration of COVID-19 vaccines (PGDs, National Protocols and summary documents)

Training products - owners and status (COVID-specific)

This table provides a list of training products that will need to be completed. Please refer to the training pathways in the Workforce and Training Toolkit, to determine whether they need to be completed by role. The green highlighted rows indicate training is available and people can complete them. Orange highlighted rows indicate training is yet to be published. Grey highlighted rows indicate the training product is to be confirmed.
